

PHASE 8 – PROJECT DEMO PLANNING

This document covers planning for the project demonstration. The demonstration should be organized before presentation so that the required materials, sequence, responsibilities, and system checks are prepared.

1. Demo objectives

This section should document the project-specific details related to demo objectives. The exact project details can be inserted from the team's implementation and demonstration.

2. Presentation sequence

This section should document the project-specific details related to presentation sequence. The exact project details can be inserted from the team's implementation and demonstration.

3. Required materials

This section should document the project-specific details related to required materials. The exact project details can be inserted from the team's implementation and demonstration.

4. Responsibility allocation

This section should document the project-specific details related to responsibility allocation. The exact project details can be inserted from the team's implementation and demonstration.

5. Pre-demo system check

This section should document the project-specific details related to pre-demo system check. The exact project details can be inserted from the team's implementation and demonstration.

6. Backup plan

This section should document the project-specific details related to backup plan. The exact project details can be inserted from the team's implementation and demonstration.

Template basis: Phase 8 contains five separate documents under Project Demonstration. This PDF is one of those five individual documents.
