

PHASE 8 – DEMONSTRATION OF PROPOSED FEATURES

This document covers the demonstration of the proposed project features. Each major feature should be presented in an understandable order, showing the relevant user flow, functionality, and expected output.

1. Feature overview

This section should document the project-specific details related to feature overview. The exact project details can be inserted from the team's implementation and demonstration.

2. Feature-by-feature demonstration

This section should document the project-specific details related to feature-by-feature demonstration. The exact project details can be inserted from the team's implementation and demonstration.

3. User flow

This section should document the project-specific details related to user flow. The exact project details can be inserted from the team's implementation and demonstration.

4. Expected outputs

This section should document the project-specific details related to expected outputs. The exact project details can be inserted from the team's implementation and demonstration.

5. Demonstration observations

This section should document the project-specific details related to demonstration observations. The exact project details can be inserted from the team's implementation and demonstration.

Template basis: Phase 8 contains five separate documents under Project Demonstration. This PDF is one of those five individual documents.
