

PHASE 8 – SCALABILITY & FUTURE PLAN

This document covers scalability and the future plan of the project. The section identifies areas in which the project can be extended or improved as future requirements arise.

1. Future feature additions

This section should document the project-specific details related to future feature additions. The exact project details can be inserted from the team's implementation and demonstration.

2. System expansion

This section should document the project-specific details related to system expansion. The exact project details can be inserted from the team's implementation and demonstration.

3. Performance improvement

This section should document the project-specific details related to performance improvement. The exact project details can be inserted from the team's implementation and demonstration.

4. Additional integrations

This section should document the project-specific details related to additional integrations. The exact project details can be inserted from the team's implementation and demonstration.

5. Future enhancement plan

This section should document the project-specific details related to future enhancement plan. The exact project details can be inserted from the team's implementation and demonstration.

Template basis: Phase 8 contains five separate documents under Project Demonstration. This PDF is one of those five individual documents.
